***Election/Restrictions – Supplemental***

1. This is a supplementary restriction election to that issued 2 October 2002, to which Applicant responded on November 6, 2002. Applicant elected Group I (A) (a) (ii), directed to Claims 1-36, 39 and 40, as they relate to phi C31 integrase, Cre reversible recombinase, and plant cells, with traverse. It should be noted that Claim 40 properly belongs in Group III, and that claim 39 is withdrawn as being drawn to a non-elected invention.

However, Group I claims are hereby further restricted to one of group (X) or (Y) as listed below

(X) Claims 1-16, and 35-36, drawn to methods of obtaining site-specific gene replacement, classified in class 800, subclass 278, for example, and

(Y) Claims 1, 17-34, and 35-36, drawn to methods of obtaining site-specific gene replacement, comprising deleting undesired nucleotides, classified in class 800, subclass 278, for example.

2. Applicant needs to elect one of the inventions from the groups (X) or (Y) for further prosecution.

3. Inventions X and Y are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects. The

Art Unit: 1638

Group Y inventions have different starting materials, use different steps, and produce different resulting products, than the Group X inventions.

4. Claim 1 link(s) inventions X and Y. The restriction requirement between the linked inventions is subject to the nonallowance of the linking claim(s), claim 1. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Art Unit: 1638

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the literature and sequence searches required for each of the Groups are not required for another of the Groups, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Georgia L. Helmer whose telephone number is 703-308-7023. The examiner can normally be reached on 8:30 - 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Amy Nelson can be reached on 703-306-3218. The fax phone numbers for the organization where this application or proceeding is assigned are 703-308-4242 for regular communications and 703-308-4242 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0196.
